Albert Manyà Pau

Software Engineer | Backend, Platforms & Developer Tooling

amanya@fastmail.com 646 27 44 71 amanya amanya amanya.github.io

Summary

Software engineer with 20+ years of experience building software, internal platforms, and hosted services for 1,000+ engineers. Strong background in C++, SDL, Python, distributed systems, and developer tooling. Currently exploring game development, with recent professional experience as a game developer and a long-standing passion for game programming, engine development, and interactive systems.

Experience

Freelance Game Developer, Paradox Interactive – Remote Sept 2025 – June 2026

C++ and UI developer

- Developed gameplay and UI features in C++ using Clausewitz, Paradox's internal engine.
- Participated in the release of Europa Universalis V.

Freelance AWS expert and Python Developer, 123compare.me – Remote Mar 2026 – June 2026

- Developed and maintained hotel pricing and alert services, including booking integrations, web crawlers, and multilingual interfaces.
- Maintained and modernized AWS EKS infrastructure, including migration planning, secrets management, and monitoring.
- Implemented a CI/CD and GitOps pilot with versioned deployments and rollback procedures, and automated preproduction database infrastructure.

DevOps, Tech Lead, and Engineering Manager, Adevinta – Barcelona Aug 2014 – June 2026

- Led and mentored a team of six engineers, then chose to return to a senior individual-contributor track in 2022 to take on a more hands-on technical role.
- Migrated 800 users and 3,000 repositories to GitHub Actions, modernising the company's CI/CD platform.
- Designed a service to orchestrate Kubernetes workloads across multiple clusters, reducing operational overhead and accelerating adoption of the internal developer platform.
- Operated CI/CD services for 1,000+ engineers including Spinnaker, Travis CI, and Artifactory.
- Built a scalable mobile CI farm based on Travis CI and VMware that ran 100+ iOS and Android builds daily.
- Built tooling that facilitated operation of our services and improved the experience for our customers.
- Participated in on-call rotation, following good incident management practices, conducting post-mortems, and running continuous-improvement loops.
- Contributed features and bug fixes to open-source projects such as Spinnaker, Travis CI, and Netflix's Eureka.

PHP Developer, Socialpoint – Barcelona Sept 2013 – Aug 2014

- Developed and maintained back-end features for games with over 6 million daily active users.

Freelance Software Developer, Codelearn – Barcelona Jan 2013 – Jan 2017

- Developed several web-based games to teach computational thinking, including a Logo-like programming environment and a real-time programming competition game based on the Karel programming language.

Web Developer, Fluendo – Barcelona — Dec 2012 – Sept 2013

Python and JavaScript Developer, Vision Robotics – Remote — Mar 2012 – Dec 2012

Tech Lead and Developer, MyNews – Barcelona — Feb 2006 – Mar 2012

Computer Vision Technician, Nexpert – Sant Sadurní d'Anoia — Apr 2002 – Feb 2006

Programming Portfolio

2D Game Engine (C/SDL)

Engine for 2D platform games in C

- amanya/c-2d-game-engine

PyKarel

Interpreter for the Karel language used in a web PvP game

- amanya/pykarel

Circuit Breaker

Prototype of a cyberpunk-themed match-three RPG

- amanya/circuit-breaker

Particles Course

Created a demo to teach programming to my daughters

- amanya/particles-course

Skills

Game Development: C++, C, SDL, game engines, UI systems, gameplay programming, tooling
Programming Languages: C++, C, Go, Python, Java, JavaScript, PHP
Cloud & DevOps: Kubernetes, AWS, Terraform, ArgoCD, GitHub Actions, Grafana, Datadog, CI/CD
Databases: PostgreSQL, MySQL, Redis, DynamoDB

Education

Universitat Oberta de Catalunya, BCS in Computer Systems Engineering — Jan 2026 – present

- Completed 84 / 270 ECTS.

Universitat Oberta de Catalunya, BCS in Computer Systems Engineering — Jan 2006 – Jan 2010

- Completed 60 / 180 ECTS.

IFP Alt Penedès, FP2 in Electrical Automation — Jan 1995 – Jan 2000
